ECUACIONES DE PRIMER GRADO

Problema 99:

Resolver

$$10 - 4(m - 1) + 10 = 3(m - 1) - 2(m - 5)$$

Solución Problema 99:

$$10 - 4m + 4 + 10 = 3m - 3 - 2m + 10$$

$$24 - 4m = m + 7$$

$$5m = 17$$

$$\boldsymbol{m = \frac{17}{5}}$$
