

PROBLEMAS DE TRIGONOMETRÍA

Problema 216:

Calcula $\sin a$, sabiendo que $\tan a = 0,782$

Solución Problema 216:

Sabemos la relación fundamental de la trigonometría:

$$\sin^2 a + \cos^2 a = 1$$

$$\frac{\sin^2 a}{\sin^2 a} + \frac{\cos^2 a}{\sin^2 a} = \frac{1}{\sin^2 a}$$

$$1 + \cot^2 a = \frac{1}{\sin^2 a}$$

$$1 + \frac{1}{\tan^2 a} = \frac{1}{\sin^2 a}$$

$$1 + \frac{1}{(0,782)^2} = \frac{1}{\sin^2 a}$$

$$\frac{(0,782)^2 + 1}{(0,782)^2} = \frac{1}{\sin^2 a}$$

$$\frac{1,611524}{0,611524} = \frac{1}{\sin^2 a}$$

$$1,611524 \cdot \sin^2 a = 0,611524$$

$$\sin^2 a = \frac{0,611524}{1,611524} = 0,379469$$

$$\sin a = \sqrt{0,379469} = 0,616010$$
